

In the claims:

1. (Previously Presented) A packaging for a premium item comprising three layers of a material, each of an equal thickness, a first layer and a second layer being laminated to one another and having co-terminal peripheries, wherein the second layer has at least one portion thereof removed for defining a void inside the packaging for receiving the premium item, the third layer being laminated to the opposite side of the second layer to the first layer, wherein the packaging is a snap-apart packaging having partial cut lines to allow a first section of the packaging to be snapped away from the second section of the packaging to provide access to the void.
2. (Original) The packaging of claim 1, wherein the third layer has a co-terminal periphery to the first and second layers.
3. (Previously Presented) The packaging of claim 1, wherein the materials are food-safe materials.
4. (Previously Presented) The packaging of claim 1, wherein the removed portion is a central portion.
5. (Previously Presented) The packaging of claim 1, wherein the partial cut lines extend across the width of the packaging.
6. (Previously Presented) The packaging of claim 1, wherein a premium item is sealed within the void of the packaging.
7. (Previously Presented) The packaging of claim 1, wherein a section of the first or the third layer is not initially laminated to the second layer, the section defining a foldable flap.
8. (Original) The packaging of claim 7, wherein the fold is bounded by a fold line extending across the width of the packaging.
